MEASUREMENT □ This entry shows some ways of expressing measurements, for example sizes, distances, weights, temperatures, and speeds. In speech, the actual words that refer to the unit of measurement, for example 'metres', 'miles', 'kilos', 'litres', or 'degrees', are often left out when the context makes it clear what you are measuring and what units of measurement you are using. Some units of measurement, especially 'foot' and 'stone', do not always add 's' to form the plural. When measurements are used like adjectives in front of a noun, you never add 's' to the units of measurement. For example, you say 'a two-litre bottle' and 'a twenty-mile walk'. The following examples show ways of expressing measurements. EG *It was close on* ***ten feet in height****... ...building* ***ten-foot*** *concrete walls around the base... modal /məʊdəl/, **modals**. In grammar, a **modal** or a **modal auxiliary** is a word such as *can* or *would* which is used in a verbal group and which expresses possibility, intention, necessity, etc. For grammatical information about modals, see □ at MODAL. For explanations of the meanings of modals, see the individual entries.

N COUNT

MODAL □ In this dictionary MODAL is used in the grammar notes beside entries to refer to a small group of words in English, sometimes called 'modal auxiliaries' or 'modal verbs'. They are: *can, could, may, might, must, ought to, shall, should, will,* and *would.* (Another group of words *need, dare* and *used to* are called SEMI-MODAL. See □ at NEED, DARE and USED.) Modals behave in the following ways: **1** They can be followed only by a verb in the infinitive form. Examples are **must** and **ought to**. EG *We **must** get there before seven... You **must** give her all the help you can... Somebody **ought to** do something about it... They really **ought to** print the instructions on the side.* **2** They do not inflect. You do not say 'He musts' or 'She musted'. **3** In questions the modal comes before the subject. Examples are **can** and **will**, EG *Where **can** I get my book published?... **Can** I just finish doing this?... **Will** you meet me there?... Where **will** you be?* **4** In negative clauses the modal comes before the negative word *not*, and in *cannot* the two words are joined together. The word *not* has a short form *n't* which can be added to modals, as in *mustn't* and *shouldn't*. With **can, shall,** and **will** further changes are made to form the shortened negative. These are *can't, won't,* and *shan't*. Examples of modals used with negatives are **would** and **might**. EG *A picnic **wouldn't** be any fun without you... We're terribly sorry, it just **wouldn't** be convenient... I **might not** see him again... It **mightn't** be a bad idea to say that at the start.* **5** A modal can be used as a verbal group on its own when it is in contrast with another full verbal group. It is not necessary to repeat the main verb. The effect is to draw attention to the contrast. Examples are **might** and **can**. EG *I haven't strangled him yet but I **might**... 'Will you stay for lunch?'–'I **can't**,' the colonel said... I **can't** do it'.–'Yes, you **can**'.* **6** They are used in question tags, as in *You will be there, **won't** you?... You can tell, **can't** you.* **7** Only one modal can be used in a verbal group.

MONEY □ This entry shows some ways of referring to amounts of money. When you express amounts of money in writing, the main unit of currency that you are using is usually shown by a symbol or letter in front of the figures. For example, £100 means one hundred pounds, $100 means one hundred dollars, and DM100 means one hundred German marks. If an amount of money consists of both the main unit and a smaller unit, for example pounds and pence, or dollars and cents, then you usually show only the symbol or letter for the main unit, and you separate the two units by a full stop. For example, $2.50 means two dollars and fifty cents. If an amount of money consists of only a smaller unit, for example only pence or cents, then the symbol or letter usually follows the figures. For example, 50p means fifty pence. When you say aloud amounts of money that have been written in this way, the full word for the unit of currency is pronounced, and it is said after the numbers rather than before them. For example, £10 is said as 'ten pounds'. In speech, the actual words that refer to the unit of currency, for example 'pounds', 'pence', 'dollars', etc are often left out altogether. However, the context usually makes it clear exactly how much you are referring to, and also which currency you are referring to. The following examples show a few ways of expressing amounts of money. EG *He was making ninety dollars a week... It costs 35 pounds a kilo... ...a million and a half dollars... ...the ten-cent packet of balloons... The machine wouldn't take 10p pieces... N MASS ☐ In this dictionary N MASS is used in the grammar notes beside entries to mean that a noun is a mass noun. An N MASS normally behaves like an uncount noun. See ☐ at N UNCOUNT. However, unlike an uncount noun, it can also treat the things that it refers to as countable, and in this case it shows the usual distinction between the form with an 's' and the form without an 's'. Therefore, when the noun refers to a particular type, brand, or measure of something, it can be used in the plural. For example, *three* **teas** means *three cups of tea* or *three types of tea*; *three* **sugars** means *three spoonfuls of sugar* or *three types of sugar*; *they're different* **reds** means *they are different shades of red.* Some uncount nouns, especially those which refer to goods that you can buy, can be used as mass nouns by people who know a lot about them and who work with them. For example, in some technical situations you could talk about *steels* as in *High-grade* steels are not suitable. In this dictionary only nouns of this type which are commonly used with a plural have been called N MASS. Examples of mass nouns are **cheese 1**, **ink 1.1**, and **jam 1**. EG *...a piece of Swiss* **cheese**... *Five kinds of* **cheese** *on a wooden platter... ...imported Italian salami, hams and* **cheeses**... *This new* **ink** *dries very quickly... ...large angular writing in purple* **ink**... *...drawings we did when we were children, in green and purple* **inks**... *We were making* **jam**... *...fruit and vegetables with which to make* **jams**.

Examples are **herd** and **flock.** EG *a **herd** of cows... ...a huge **flock** of sheep.*

N PLURAL □ In this dictionary N PLURAL is used in the grammar notes beside entries to mean that a noun is used with a plural verb when it is the subject of the verb. If a pronoun is used to stand for the noun, then it is a plural pronoun such as 'they' or 'them'. Examples are **clothes, police,** and **contents.** EG *Her **clothes** were elegant but simple. She bought **them** at Harrods... Where will you go if the **police** find out?... She tested the **contents** by squirting **them** onto her hand.* Plural nouns which have the plural ending *-s* generally lose the *-s* when they are used as modifiers. An example is **trousers.** EG *He slipped it into one **trouser** pocket.* However, a few nouns keep the *-s* when they are used as modifiers. The grammar note beside these nouns says PL FORM WHEN MOD. An example is **fireworks.** EG *...a **fireworks** display.* Some plural nouns which end in *-s,* such as *jeans, binoculars,* and *glasses,* refer to a single object which has two main parts. With these, you sometimes refer to the item as a *pair of jeans, a pair of binoculars,* etc. These are described in the grammar notes as N PLURAL: ALSO *a pair of* N. An example is **scissors.** EG *The **scissors** are over there on the desk... I was sent out to buy **a pair of scissors**... I wish I'd brought some **scissors**.*

N PROPER □ In this dictionary N PROPER is used in the grammar notes beside entries to mean that a noun is a proper noun. An N PROPER refers to one particular person, place, or institution. Proper nouns behave in the following ways: **1** Most proper nouns are used without a determiner before them. Examples are **Asia, Hell,** and **Father Christmas.** EG *...the largest country in **Asia**... ...a descent into **Hell**... the pains of **Hell**... Colin wants to meet **Father Christmas**.* **2** There are some proper nouns which always have *the* before them. These are described in the grammar notes as N PROPER: *the*+N. Examples are **BBC** and **Church of England.** EG *How should **the BBC** be financed?... She'd moved to **the BBC** from publishing... I'm not a member of **the Church of England** myself... It would have to be accepted in **the Church of England**.* **3** Sometimes the same word can be used as a count noun and a proper noun. Nouns like this are described as N COUNT/PROPER and N COUNT/PROPER: *the*+N. An example of a word which is described as N COUNT/PROPER: *the*+N is **prime minister.** EG *...the conference of Commonwealth **Prime Ministers**... N UNCOUNT □ In this dictionary N UNCOUNT is used in the grammar notes beside entries to mean that a noun is an uncount noun. N UNCOUNTS behave in the following ways: **1** They do not treat the things that they refer to as countable, and therefore there is no choice between a form with an *-s* and a form without an *-s*. In order to treat the things that they refer to as countable, they are involved in a partitive construction such as *two pieces of* and *five chunks of* before the N UNCOUNT. See □ at N PART. See also N MASS. Examples of N UNCOUNT are **furniture** and **happiness**. EG *The room was small, low and overcrowded with **furniture**... I believe that the aim of life is to find **happiness**.* **2** They do not usually have a determiner in front of them. When they do have a determiner. further information about the noun is usually given to explain it more fully. This further information may be in the form of a modifier before the noun or a relative clause or prepositional group after the noun. See □ at SUPP. EG *He started smashing up all the **furniture**... ...the ultimate goal of all revolutions: the **happiness** of the individual... ...a **happiness** that he had never expected.*

NUMBER □ In this dictionary, information about the ways in which numbers are used in English is given both in the entries for individual words and also in □ at AGE, DATE, MEASUREMENT, MONEY, and TIME. The way that numbers behave grammatically is explained in □ at NUM and ORDINAL.

This entry shows some ways of saying numbers and of expressing ideas such as quantities, fractions, percentages, ratios, and approximate amounts. The chart that accompanies this entry shows ways of counting and expressing numbers.

The numbers 'hundred', 'thousand', 'million', and 'billion' are usually preceded by another number, or by the determiner 'a' if you are referring to only one hundred, one thousand, etc. EG *...a thousand dollars... ...over thirty thousand inhabitants.*

For numbers greater than a hundred, it is usual to say 'and' before the part of the number which is less than a hundred. For example, 351 is said as 'three hundred and fifty-one' and 49,280 is said as 'forty-nine thousand two hundred and eighty'.

There are different ways of saying numbers greater than a hundred. For example, 250 can be said as 'two hundred and fifty', 'two fifty', or 'two five oh'. 2,500 can be said as 'two thousand five hundred' or 'twenty-five hundred'. For longer numbers such as telephone numbers or account numbers, it is usual to say the figures individually. For example, you would say the number 131274 as 'one three one two seven four'. The number 0 is usually said as 'oh', although 'zero' and 'nought' are sometimes used instead.

The following examples show some ways of referring to quantities. EG *The number of congress members declined from 371 to 361... I went back there half a dozen times after that first meeting... She was elected by more than 5,000 votes... An enormous number of photographs were taken, of which the Imperial War Museum has about eight thousand.*

The following examples show some ways of expressing fractions, decimals, percentages, proportions, and ratios. EG *...two fifths of the forest... ...a quarter of all children in this area... A third is almost the same as point three three... 80% of the workforce voted for a strike in a secret ballot... Only one in ten of the residents objected... Inflation is now running 70 per cent higher than it was in 1960... It's worth a hundred times more than that... ...in the ratio of approximately 2:1... The female/male ratio was 19 to 1.*

only /ə͡ʊnli^{1}/. **1** **Only** can be placed almost anywhere in a sentence. In written English it is usually considered correct to place 'only' immediately before the thing it refers to. In spoken English, however, stress often indicates what 'only' refers to, and so there is not as much need to be careful about the position of 'only.'

2 **Only** is used to indicate that something is the one thing that is done, that happens, or that is relevant in a particular situation, in contrast to all the other possible things that are not done, do not happen, or are not relevant. EG *I'm only interested in finding out what the facts are... He could see only Kowalski, no one else... He read only paperbacks... The video is to be used for teaching purposes only... You're only here tonight because I asked for you.* ● You use **only if** to say that one thing will not happen unless another thing happens. EG *I will come only if nothing is said to the press... PASS □ In this dictionary PASS is used in the grammar notes beside entries to refer to the passive form of a verb. This is formed by the verb *be* followed by a past participle, so the passive of *to reject* is *to be rejected*. The passive allows you to mention an action without saying who did it. For example, *Your application **was rejected*** avoids saying who rejected the application. In the corresponding active clause you have to say who did the rejecting, as in *The committee rejected your application*. If you want to mention who did it in a passive clause, you use a prepositional group with the preposition *by*. EG *Your application **was rejected** by the committee*. The subject of the passive clause is the same as the object of the active clause. Only transitive verbs can have a passive.
